

STATEMENT OF PURPOSE

RS23264

Establishes a schedule of fees for oil and gas permitted activities.

FISCAL NOTE

Currently the Oil and Gas Conservation Commission receives a General Fund appropriation of \$156,200 to supplement regulatory activities until program fees and production royalties can cover the costs of the program. As activity related to the development of oil and gas resources increases, updates to the fee schedule are necessary to cover the costs of the various permitting activities. The fee schedule in this legislation is intended to cover costs directly tied to administering the several permitted activities in the Oil and Gas Program.
